A Pretty Cottage.

buildings in this climate, but there these same "organs" will smother are many who hold opinions to the him with fulsome culogy and complicontrary. Mr. W. C. Davis has de- ment. It is the way of small and litmonstrated practically that a properly | the politicians. constructed brick house is as cool in summer and as warm in winter as are the adobe pulldings, beside being more attractive looking and scarcely known lumber merchant of this city. concluded a short time ago to practically illustrate his theory that a building may be constructed of wood and be fully as comfortable as the adobe structures which form so large a part of Tueson. He accordingly had the plans drawn for a very pretty and commolious cottage in accordance with his belief, and the building is now approaching completion, on the soothwest side of Military Plaza. It is to be a one-story cottage, with four commodious rooms, two closets, bathhouse, etc., and when finished will add very much to that part of the city. which now seems likely to become the fashionable residence quarter. The house is raised three feet above the ground, the rooms being 14 feet from floor to ceiling and a piazza 8 feet wide and adorned with turned columns and fanciful mouldings, will adorn the whole front of the house, The special protection against the heat consists of hollow walls, wellventilatea and overhanging roof, and lattice work all around the three-foot base of the building, permitting a free circulation of air. Mr. Mason estimates the cost at about \$2200, which. if the house is as comfortable as he believes it will be, is not too much to pay for an attractive and beautiful home. Certainly Mr. Mason's experiment cannot be too highly commended, as everything which adds to the beauty of the city adds in a much greater ratio to Tucson's future night he disappeared, leaving his

A Shower of Railroad Spikes.

The great demand for railroad spikes has called into existence a reically. The iron, is in the form of taken in by the machine, and in 13 seconds reduced in diameter and increased in length to a rod 36 foot long, and nine-sixteenths of an inch square.

In 40 seconds more this rod is cut in two and is passed through two spike machines, from which finished spikes shower at the rate of 40 tons every ten working hours, By working "double time" five of these machines have turned out 1,100 kegs of railroad spikes per day, each keg containing 150 pounds, or 13 kegs to the ton. The product of ordinary rolls and machines is from two to two and a half tons of finished spikes per working day of ten hours. Electric Lights in Quartz Mills.

The Salt Lake Tribune of the 12th instant says that the Walker Bros. of that city have just entered into a contract with the agent of the Brush electric light for one of their largest sized machines with 14 lights, with which they will illuminate their quartz mills at Walkerville, Montana. These lights will be disposed about the works as follows: seven will be used in the large mill, four in the small one, one in the hotsting works, and two will be placed so as to light the dumps. The illumination afforded by this number of lights will enable the men to work at night as well as in the daytime, while the expense The following gentlemen were will be less than that of ordinary light. It will be the first instance of the employment of the electric light

Cotton in Arizona.

(From the Phenix Herald.) Henry Orme picked his first poll of cotton on the 4th of September from a stalk of cotton grown on his farm near Phenix from Texas cotton seed which he pianted on the 1st of June. This gentieman has had many years experience in the cotton fleids of the Southern States and understands the plant well, and it is his opinion that it will grow well here. As it is worth from three to four times as much as grain to the acre it stands our farmers well in hand to see to this matter. Mr. Orme will next season experiment with some of the cuttings of Sandwich Island cane lately received from Maj. Hosper, of San Francisco, and distributed by the Herald.

United States Foreign Commerce. The official statement of the imports and exports of the United States for the fiscal year ended June 30, 1880. has just been issued by the Bureau of Statistics, from which the following summary is made: Imports free of duty, 1880, \$208,301,863; do., 1879. \$142,581,505. Increase for the year. \$65,620.358. Imports dutiable, 1880. \$459,652,883; do., 1879, \$303,096,279. Increase for the year, \$156,556,613. Total imports, 1880, \$667,954,746 J. McElliott, presented us with do., 1879, \$446,777,775. Total increase for 1880, \$222,176,971. The exports for the year ended June 30, 1880, as compared with those of 1879, San Xavier mine. Mr. McElliott speaks have been: Total exports, 1880, Increase for 1880, \$125, 199, 217.
